

are you our next star?

We are looking to appoint a

Senior Project Manager

to take charge of Process Engineering for our turn-key green hydrogen solutions.

-  Full-time
-  Maakri 19/1, 10145 Tallinn, Estonia
-  Experienced professional
-  Flexible hours

What you would do

- Coordinating the establishment of a 1 MW green hydrogen project in Tallinn and will be responsible for the construction of the system from the start to finish
- Leading the project consortium on all the topics related to hydrogen
- Establishing contact and dialogue with authorities in regards to the development project
- Managing and coordinating the subcontractors (including EPCM) and consultants
- Together with the technical team, providing input to hydrogen-related equipment procurements
- Coordinating safety and risk assessments, environmental assessments, system commissioning (FAT and SAT).
- Using your knowledge of best practices from other similar projects for educating the local stakeholders, and helping to establish a standard procedure for permitting green hydrogen projects in Estonia
- Outreach activities to ensure public acceptance of hydrogen projects
- Responsibility for timely reporting to internal and external stakeholders, including the funding agency

The ideal person we are looking for

- At least five years of experience in relevant construction projects
- Experienced in government or EU grants
- Sound knowledge of the technical aspects of hydrogen production by electrolysis, hydrogen storage, hydrogen compressors, and hydrogen refueling
- Strong interest in technical topics and energy transition
- Skilled in managing budgets, schedules and research and development teams
- Confidence in communicating with internal and external stakeholders
- Highly motivated with a hands-on mentality and team-oriented mindset
- Experience in public outreach activities is an advantage
- Knowledge of Estonian is an advantage

What we offer

- The chance to join a world-class team backed by top investors that all believe in the future of green hydrogen in transportation.
- A business with highly ambitious growth plans for the next 10 years – an opportunity to board the rocketship at a very early phase
- Being a start-up, you will have the chance to participate in building and developing structure and processes, boosting both your interpersonal and career development
- An agile working environment that is moving forward quickly
